Hussein Dheyaa

SOC Analyst | Threat Hunter | Incident Responder

husseindeaaj@gmail.com | +9647761781031 | Baghdad, Iraq | LinkedIn | GitHub

SUMMARY

Blue team analyst with hands-on experience triaging alerts in Splunk and running investigations in ELK/Kibana. I came to defense from the offensive side — couple years of CTF work in web exploitation, cryptography, and reverse engineering — so I tend to read an alert by asking how I would have caused it. Comfortable working in Kali and Docker, with ongoing practical training in DFIR and threat hunting. I also build CTF challenges, not just solve them.

EXPERIENCE

Security Researcher (Internship) *Jul 2025 – Sep 2025*
Middle Technical University Cybersecurity Engineering Department Baghdad, Iraq

- Network assessments: packet inspection, traffic analysis, firewall configuration.
- Hardened Linux and Windows systems using Wireshark, Nmap, and Metasploit.
- Automated routine security and network scanning tasks with Python.

Trainee *Jul 2026 – Aug 2026*
Ministry of Interior Cybersecurity Directorate Baghdad, Iraq

- Placed 1st out of 1200 participants in the program's final Capture The Flag competition.
- Network security fundamentals: TCP/IP analysis, packet inspection with Wireshark, and firewall configuration.
- System hardening for Linux and Windows: access control, service reduction, and logging.
- Offensive and defensive techniques: reconnaissance and exploitation with Nmap and Metasploit, incident response, and digital forensics.

EDUCATION

Bachelor of Engineering (B.E.) in Cybersecurity *Oct 2023 – Jun 2027*
Middle Technical University College of Electrical and Electronic Technology Baghdad, Iraq

Relevant Coursework: Network Defense, Digital Forensics, Ethical Hacking & Penetration Testing, Cybersecurity Governance, Artificial Intelligence , Web Applications Security . GPA : 4.0 - A - 95%

CERTIFICATES

- **Security Analyst Level 1 (SAL1)** | ***TryHackMe*** *Jul 2026*
- **Certified Threat Hunting Professional (eCTHP)** | ***INE*** *Sep 2026*
- **Certified Digital Forensics Professional (eCDFP)** | ***INE*** *Sep 2026*
- **CS50x & CS50 Cybersecurity** | ***Harvard University*** *Sep 2024*
- **Certified Incident Responder (eCIR)** | ***INE*** *Aug 2026*
- **ISO/IEC 27001 Information Security Associate** | ***skillfront*** *Aug 2026*

SKILLS

- **Languages:** Python, SQL, C/C++, AI
- **Blue Team:** Splank, Snort, Elastic, ATT&CK Matrix
- **Red Team:** Nmap, burpsuite, problem solving
- **AI:** Prompt Injection, LLM jailbreaking

PROJECTS

- **SOC Training & Phishing Simulation Platform** — ***Lead Architect***: Multi-vector security awareness platform (phishing, smishing, vishing, whaling) with campaign telemetry, resilience scoring, and exportable audit reports. Led architecture and a team of three; deployed via Docker with managed Postgres.

  Tech: Next.js, TypeScript, PostgreSQL, Prisma, Docker

- **"wctfsv" Web CTF Solver** — ***Creator***: Modular CLI toolkit for authorized web pentesting: SQLi/XSS detection, directory and subdomain enumeration, header/cookie/source analysis, and a chained scan mode with JSON reporting. Multi-threaded, with auth and custom-header support.

  Tech: Python, Kali Linux

- **"Cyberpath" Cybersecurity Learning Roadmap Builder** — ***Creator***: Single-page app generating personalised, shareable cybersecurity learning roadmaps across six tracks, scaled to the learner's experience, pace, and budget. URL-encoded state, dependency-free PDF export, WCAG 2.2 AA.

  Tech: Vanilla JavaScript, CSS, HTML (zero dependencies)
